LinkedIn: <https://www.linkedin.com/in/abdirahman-abdulaziz/>

Portfolio: <https://abdirino.github.io/Abdirino-s-PortFolio/>

SKILLS:

- Proficient in HTML, CSS, JavaScript and TypeScript, with a focus on writing clean, semantic code to ensure efficient and maintainable web applications.
- Experience with React, a powerful JavaScript library for building user interfaces, enabling me to develop electric and interactive websites.
- Strong problem-solving abilities and a keen eye for design, allowing me to implement responsive layouts and intuitive user experience.
- Familiarity with version control system such as Git, ensuring collaborative development and seamless code management.
- Solid understanding of web accessibility standards and best practices, ensuring that websites are inclusive and accessible to all users.
- Excellent communication skills and a collaborative approach, enabling effective teamwork and the ability to translate client requirements into technical solution.

EDUCATION:

Inceptor Institute of Technology Boot Camp | Certificate in Website and Software Development | Nairobi | June 2023

- Built complex and functional web application increasing in my grades by 35%.

PROJECTS:

- **Responsive Portfolio Website**
 - Developed a personal portfolio website using HTML, CSS and JavaScript, showcasing my skills, experience and previous projects. Devised a responsive layout, resulting in a 40% increase in mobile user engagement and a 25% decrease in bounce rate, with smooth navigation and interactive animation.
- **E-Commerce Website**
 - Engineered a responsive E-commerce website using react, incorporating product catalogs, user authentication, and a seamless checkout process. Implemented features such as search functionality, filtering options and user reviews to enhance user experience and drive conversions. This made an increase of 25% in average order value.
- **Car Rental Website**
 - Created a car rental website using React, allowing users to browse available cars, make reservations, and manage bookings. Added features such as search filters based on location, date, and car type, resulting in a 30% increase in user satisfaction and 25% decrease in search time interactive car selection with price details, with seamless booking experience.
